

- ▲ Motor-driven diaphragm pump with integrated frequency converter
- ▲ High reserves due to a powerful asynchronous motor
- ▲ High flexibility due to variably adjustable suction speeds
- ▲ Almost pulsation-free metering possible
- ▲ Metering capacity setting by varying the pressing speed externally (norm signal 0/4 - 20 mA) and internally (key preselection) in the range 1:100
- ▲ Enable signal input makes safe control handling possible

Version V15

Version V60

The metering pump series ELADOS® EDP L is equipped with a robust three phase alternating current motor, which is controlled via an integrated frequency converter. In combination with a corresponding electronic system, the duration of the suction and metering stroke can be set to different lengths of time. This allows a multitude of applications for this pump concept.

The metering rate can be set in a range of 1:100, thus facilitating a wide range of capabilities with a single pump. Additionally, by choosing an

adequately long metering stroke time, an almost pulsation-free metering can be achieved. Also, by selecting different metering modes, it is possible to adjust the motor speed and suction stroke speed of the pump flexibly to high product viscosities or difficult suction conditions.

Norm signal input and enable signal input (V15) as well as pulse input and batch input (V60) increase the universal applicability of this pump series and turn it into a true all-rounder.

## Technical Data

### General Data

<b>Max. pump capacity* [l/h] *</b> in metering mode:	
high/low	220
medium	183
low/high	147
<b>Metering back pressure [bar]:</b>	10
<b>Delivering capacity per stroke [cm<sup>3</sup>]:</b>	30,56
<b>Reproductivity [%]:</b>	<± 3
<b>Max. admissible viscosity [mPas]:</b>	600
<b>Suction height [mWs]**:</b>	2
<b>Number of strokes [1/min]</b> in metering mode:	
high/low	120
medium	100
low/high	80
<b>Recommended minimum diameter D<sub>i</sub> [mm]</b>	
suction connection	20
pressure connection	12
<b>Ambient temperature max. [°C]:</b>	40
<b>Weight [kg]</b> (with PP/PVDF pump head):	approx. 25,7
<b>Colour:</b>	blue RAL 5007

\*Performance values are determined on the basis of 20° C warm water as metering medium

\*\*Suction height under condition of clean and moistened valves

### Electrical Data

<b>Power supply:</b>	115/230 V / 50/60 Hz ± 10 %
<b>Current consumption [A]:</b>	8 (115 V / 50/60 Hz) 4 (230 V / 50/60 Hz)
<b>Motor power [KW]:</b>	0.95
<b>Safety type:</b>	IP 55
<b>Insulation class:</b>	F

With reservations, all data refer to a water temperature of 20° C according to the instructions of the technical manual!

**Note:** To keep our products up-to-date, we reserve the right for technical changes. Further special versions on request!

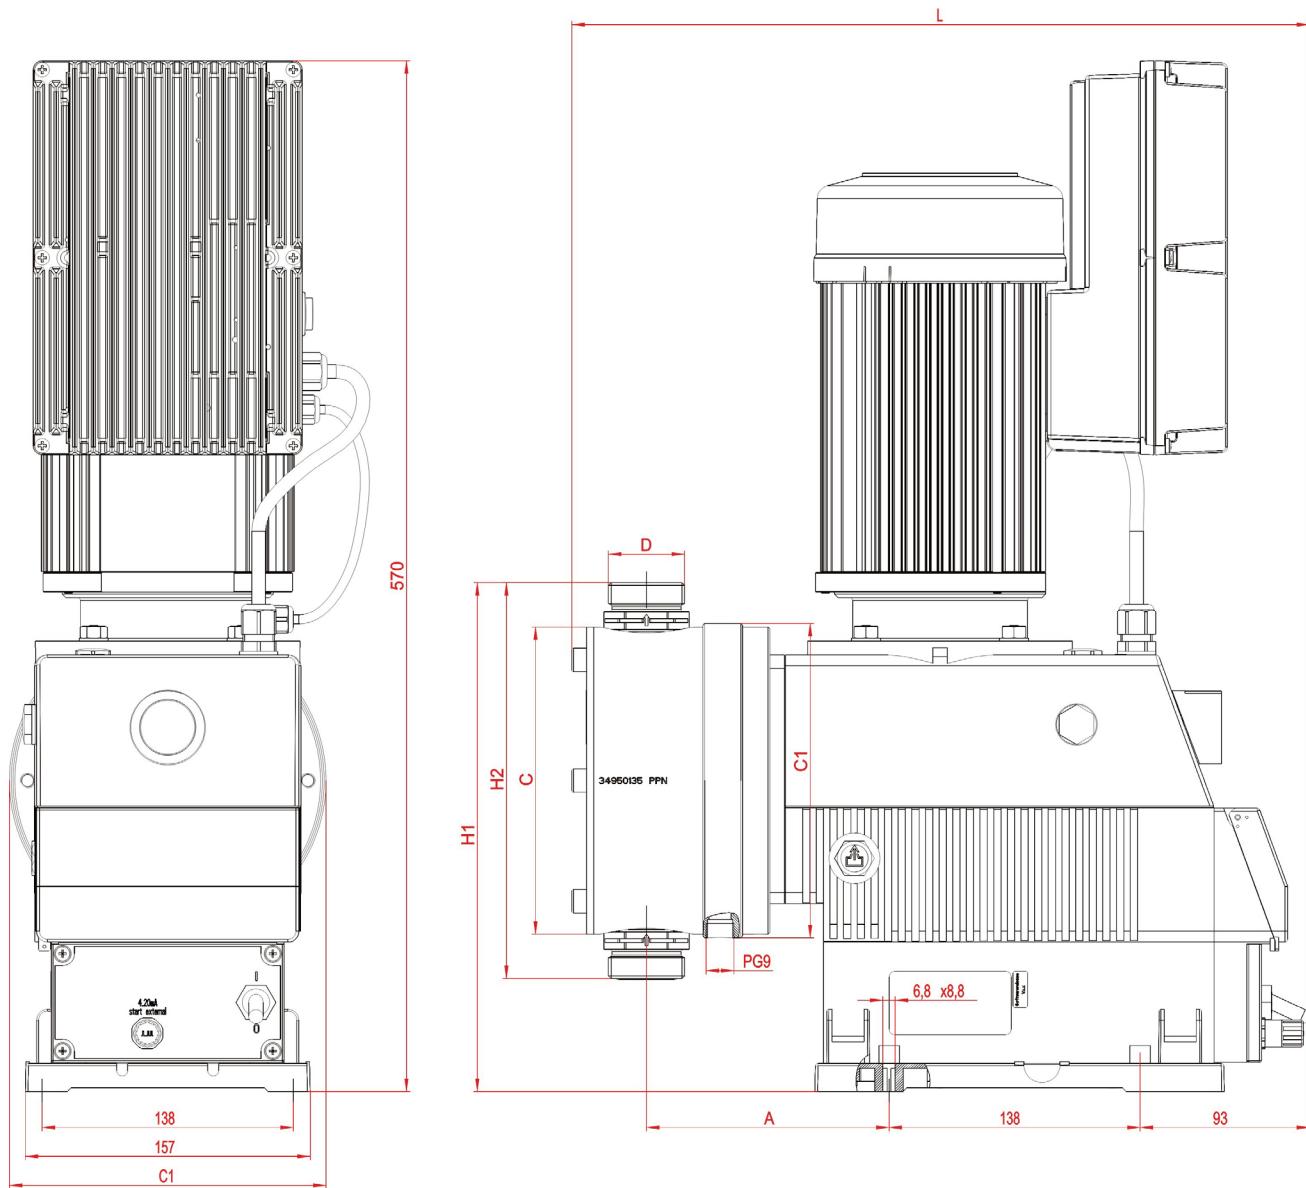

**Material**

<b>Housing:</b>	thermoplastic polyester
<b>Pump head:</b>	polypropylene (PP) <b>optional:</b> PVDF or stainless steel 1.4571
<b>Diaphragm:</b>	PTFE – EPDM compound diaphragm
<b>Seals:</b>	FPM 602 (Viton B) <b>optional:</b> EPDM or Kalrez
<b>Valve balls:</b>	ceramics <b>optional:</b> PTFE or stainless steel 1.4401

## Electrical versions

### V 15

- on/off switch
- electronic metering rate setting
- 8 digit display for the adjusted metering rate
- release signal input
- norm signal input 4-20mA
- 3 different metering modes selectable

### V 60

- on/off switch
- electronic metering rate setting
- back-lit graphic display
- release signal input
- norm signal input 0/4-20mA
- stroke signal output and alarm signal output
- batch metering
- metering monitoring or metering rate control  
(in combination with dongle plate and oval gear meter)
- acquisition of operational data and consumption data
- calibration function
- 3 unchangeably stored metering modes selectable or  
metering mode (suction stroke duration and min. pressure  
stroke duration) freely adjustable

### Multifunction valve

This safety-relevant component serves the purpose of protecting the piping system and the metering pump and permits a safe and reliable commissioning and maintenance of the system.

The multiple function valve covers the following functions: **overflowing, retaining pressure, venting and draining.**

Dimensions (L \* D \* H): 341 x 160 x 200 mm
