AKM® 2G Servo Motors

The Next Generation of Servo Motors Offering Industry Leading Performance with a Compact Footprint

KOLLMORGEN

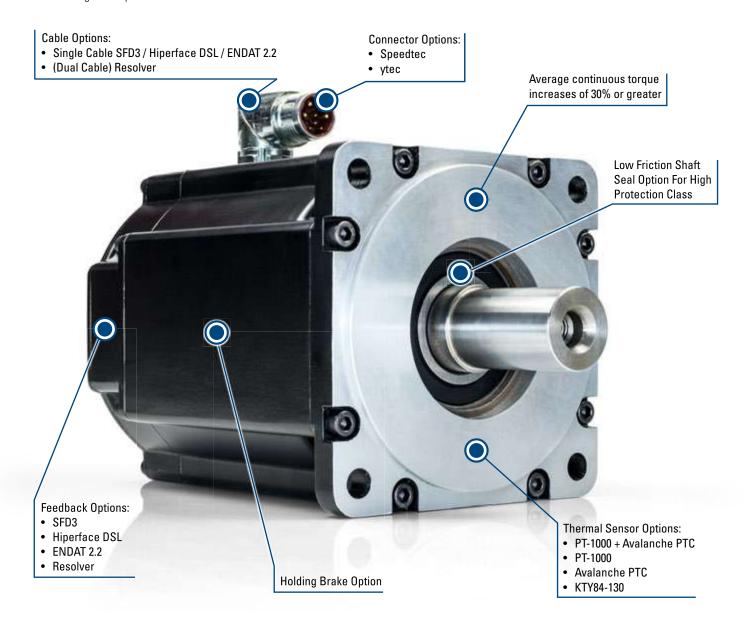

Because Motion Matters™

AKM®2G represents the latest evolution of the industry leading AKM motor product family.

With average continuous torque increases of 30%, OEMs and users can achieve substantial machine performance increases without increasing the size of the motor.

The improved torque density allows a smaller motor to be used which reduces the machine footprint without sacrificing performance.

- Extensive Selection of Feedback options to match application and performance requirements
- Shaft, mounting and connector options for optimal flexibility
- Holding Brake option

Get the same performance in 20% less space.

For new machine designs, the AKM2G allows customers to decrease the size, footprint, and complexity of the machine, while still getting the power and performance they need.

The AKM2G drops right into existing machine designs to increase performance, when compared to competing motors, without increasing the size of the motor.

The AKM2G features six sizes with performance levels between 0.3 and 10kW. It will offer selectable options such as feedbacks, mounting configurations, and performance capabilities. Due to the modular structure of their products, Kollmorgen is better equipped than competitors to adapt motors to the requirements of a specific application in parallel with standard production needs. Machine builders are then able to choose from a wider range of standard models that leverage Kollmorgen's extensive product and application knowledge.

AKM2G motors are optimized for use with the Kollmorgen AKD® Servo Drive and the forthcoming AKD® 2G family of new generation servo drives, but are also capable of providing all their design benefits in conjunction with the customer's choice of servo drives.

Kollmorgen has been offering single-cable technology since 1995.

AKM2G Series Servo Motor Family

About Kollmorgen

Kollmorgen is a leading provider of motion systems and components for machine builders. Through world-class knowledge in motion, industry-leading quality and deep expertise in linking and integrating standard and custom products, Kollmorgen delivers breakthrough solutions that are unmatched in performance, reliability and ease-of-use, giving machine builders an irrefutable marketplace advantage.

For assistance with your application needs in North America, contact us at: 540-633-3545, support@kollmorgen.com or visit www.kollmorgen.com for a global contact list.
