

This catalogue concerns only ball screws.

However, a ball screw may not meet all the demands of your application ; in this case choose a roller screw as roller screws perform beyond the limits of ball screws.

Consult SKF or ask for our catalogue n°4351 : SKF roller screws.

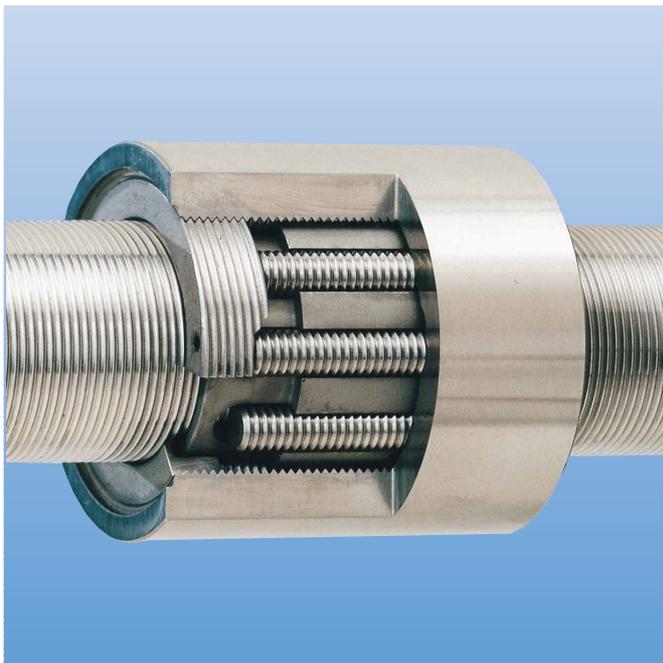

### Planetary roller screws

$\varnothing$  = 8 to 210 mm

$P_h$  = 4 to 42 mm

- \* high load carrying capacity
- \* ability to survive occasional blows and shock loads
- \* highly reliable, even in hostile surroundings and at high rotational speed.

### Recirculating roller screws

$\varnothing$  = 8 to 125 mm

$P_h$  = 1 to 5 mm

- \* fine resolution
- \* high rigidity
- \* long life.
