## Milestones of our success story

- 1930** Foundation as a repair works for direct current and three-phase motors
- 1945** Start of motor production with the construction of three-phase motors
- 1960** Production of direct current motors
- 1970** Development of modern power electronic components for main drives and servo motors
- 1985** New three-phase servomotors and transistor converters
- 1991** Baumüller is a pioneer in the field of direct drive technology
- 1995** Baumüller makes drives intelligent
- 2000** omega Drive Line II – the fastest PLC in a drive worldwide
- 2003** Motion Control concept is expanded from single to multi-axis applications
- 2004** Opening of the new training center in Nuremberg
- 2005** Integration of Nürmont Installations GmbH & Co. KG into the Baumüller Group
- 2006** Development of the sizemaXX software for drive dimensioning
- 2010** Hybrid concept for mobile drives in utility vehicles in the powerMELA project
- 2012** Start of production in Wujiang, China
- 2013** Baumüller joins the VDMA sustainability initiative Blue Competence

Baumüller looks back at over 80 years of history as the basis for an innovative path to the future. Our customers especially appreciate our branch expertise and our on-site support, worldwide.

## »be in motion« With us into the future

Adapting and improving, that is our goal, and has been for over 80 years. Tradition and following a pioneering spirit are the pillars of our family-operated company. This spirit is tangible in all of our products and makes us a long-term reliable and stable partner for modular and flexible automation solutions.

Our motto "be in motion" stands for our aim of staying a step ahead of current technology trends. It also stands for a strong partnership, in which we quickly and flexibly support our customer – with first-class products and services in all phases of a machine's service life.

This is self-evident for us. Because we judge our success based on your satisfaction.

## Key facts

Established:  
1930

Owner:  
The Baumüller family

Employees:  
approx. 1,650

Production facilities:  
Germany  
Czech Republic  
Slovenia  
China

Service and support worldwide:  
at more than  
40 locations

Quality management:  
DIN EN ISO 9001:2008

# Innovation partner

## Technologies for efficiency and sustainability

At Baumüller, innovation is promoted by continuous research, development and investment. But especially by one thing: Cooperation. Many of our developments are the result of close cooperation and a lively exchange with customers and research institutions. They are the motivation which drives our performance making us a preferred technology partner – in all of the crucial markets.

The reduction of the total costs of ownership is a focus at Baumüller. The key to success here is the efficiency and productivity of the overall system. From the drive to the software, we continuously optimize systems

and calibrate them perfectly for your application. The result: a high level of efficiency even for complex tasks.

Our innovation policy is based on energy and cost efficient machines and systems. We thus make an important contribution toward your competitiveness and lay the groundwork for environmentally-friendly production. With our low-maintenance system solutions, we ensure maximum machine availability and are thus drivers of sustainability and increased productivity.

With customized system solutions Baumüller ensures maximum efficiency, productivity and sustainability.

- Solutions
- Automation
- Control cabinets
- Decentralized drives
- Drive electronics
- Electronic manufacturing services
- Maintenance
- Mobile drives
- Motors
- Relocation and installation
- Safety technology
- Sheet metal solutions
- Software tools
- System engineering
- Technology modules

# Branch expertise Customized concepts

The branch and machine-specific solutions from Baumüller are used in all mechanical engineering sectors and in new fields, such as electro mobility and energy generation. We support you with our long years of branch experience: from the initial project planning phase to the commissioning and maintenance of your machines and systems.

We strategically pursue the modularization of our products as scalable systems – from motors and servo controllers to control systems through to software. The result: A flexible machine portfolio for creating highly specialized systems that minimize your time, costs and development effort.

Machine and process know-how are bundled in Baumüller technology modules and immediately available for your application. Thanks to the intelligent use of interfaces to open standards, automation solutions from Baumüller are future-oriented and easily expandable. The engineering framework ProMaster bundles all of these software services in a user-friendly platform.

# Service Support without boundaries

Baumüller is internationally renowned for intelligent and sustainable automation solutions. Whether in Germany, Italy, Switzerland, Brazil, China, India, USA or Canada – around the world, leading machine manufacturers in all of the significant markets rely on our competence.

Local highly-qualified application engineers integrate country-specific requirements and standards in optimized and end-to-end systems. But one thing stays the same: Our energy-efficient solutions offer the highest level of precision, dynamics and reliability.

Worldwide and throughout the entire lifecycle of your machine and systems, you can rely on competent and flexible support from our service facilities: From the installation and commissioning through to preventative maintenance, quality repairs to system migration and machine relocation. In your language, at your location and on your schedule.

Global competence – Proximity to the customer: Leading machine builders around the world rely on Baumüller.

## Know-how Passionate specialists

Baumüller provides your company with know-how – via professional, customized courses and training activities. We train your employees in small groups in the modernly equipped facilities at the Baumüller Academy: by specialists for specialists.

We also conduct customer-specific courses on-site at your offices or even directly on the machine. By investing in the training of young people and cooperating with technical universities and educational facilities, we secure the innovation of tomorrow.

The active exchange with interested parties and technological and economic networks strengthens our company and supports the achievement of your goals. Baumüller maintains a number of memberships and partnerships with influential national and international organizations.

We push on where others stop – with training, networking and research.
