UNIVER Headquarter

UNIVER started its activity in the '70s in the field of industrial automation with the production of the first series of pneumatic valves and poppet valves for vacuum.

In the following decades the range of technologically advanced and original pneumatic components has allowed a continuous growth and development of the company, till it has become one of the major Italian companies in the production of industrial Automation equipment.

In the year 2000, after years of experience in the supply of pneumatic components to the Automotive market, the Automotive Division was created and since then it has developed solutions for the automotive industry.
The electronic division, as a support of the Pneumatic Automation and Automotive divisions, is specialized in the study, design and manufacturing of the electric and electronic devices integrated in the Univer products.

The engineering of the products and of the processes, the production, the tests and customer service are attended to thanks to a severe quality standard. Since 1991 UNIVER is UNI EN ISO 90001 certified.

The organization of the sales network is coordinated by the Headquarters of UNIVER S.p.A. in Milan.
In Italy the commercial company UNIVER Service S.r.l. guarantees a quick and efficient service with the aid of operational offices and distributors in the whole country. The UNIVER Group has many direct companies and an active distribution network which covers the most important industrialized areas.

>Protection degrees for coil with connector

By protection degree we mean the intrinsic ability of live electrical equipment to protect and to protect itself against casual contacts and penetration of solid perticles and water. It is defined with the abbreviation "I.P." followed by 2 figures: the first, **0** to **6**, defines the protection against casual contacts and penetration of particles; the second, **0** to **8**, the protection against water.

Protection degree against casual contacts and penetration of particles

	Protection/Denomination	Explanation
0	No protection	No special protection for people against casual contacts with live parts or moving parts No protection of the equipment against the penetration of foreign solid particles
1	Protection against the penetration of large-sized solid particles	Protection against casual contacts of large surface with live parts or moving parts inside the equipment, for example contacts with hands, but no protection against the voluntary access to these parts Protection of the equipment against the penetration of solid particles with a diameter larger than 50 mm
2	Protection against the penetration of medium-sized solid particles	Protection against contacts of fingers with live parts or moving parts inside the equipment Protection against the penetration of solid particles with a diameter larger than 12 mm, such as fingers
3	Protection against the penetration of small-sized solid particles	Protection against contacts of tools, wires or the like, thicker than 2.5 mm with live parts or moving parts inside the equipment. Protection against the penetration of solid paticles with a diameter larger than 2.5 mm, such as tools, wires and so on
4	Protection against the penetration of very small-sized solid particles	Protection against contacts of tools, wires or the like, thicker than 1 mm with live parts or moving parts inside the equipment. Protection against the penetration of solid particles with a diameter larger than 1 mm, such as thin tools and wires and so on
5	Protection against dust deposits	Full protection against contacts with means of any kind with live parts or moving parts inside the equipment. Protection against dust deposits The penetration of dust is not fully eliminated, but it is reduced to such an extent as to assure the good operation of the equipment
6	Protection against dust penetration	Full protection against contacts with means of any kind with live parts or moving parts inside the equipment. Protection against dust deposits Full protection against the penetration of dust

Protection degree against water

	Protection/Denomination	Explanation
0	No protection	No special protection
1	Protection against water drops falling perpendicularly	Water drops that fall perpendicularly must cause no harmful effect
2	Protection against water drops falling slantwise	Water drops that fall at a slanted angle of up to 15° to the perpendicular direction must cause no harmful effect
3	Protection against water dripping	Water that falls at a slanted angle of up to 60° to the perpendicular direction must cause no harmful effect
4	Protection against water sprays	Water sprayed against the equipment from any direction must cause no harmful effect
5	Protection against water jets	A water jet directed against the equipment from any direction must cause no harmful effect
6	Protection against immersion	The water penetrating into the equipment due to a temporary flood, for example during rough sea conditions, must cause no harmful effect
7	Protection against immersion	Water must not penetrate in such a quantity as to damage the equipment, should the equipment itself be immersed for pre-established times and at pre-defined pressures
8	Protection against submersion	Water must not penetrate in such a quantity as to damage the equipment, should the equipment itself be submerged at pre-defined pressures and for an undetermined period of time

Sub-base for external electric connection

Sub-base in extruded anodized aluminium with conveyed supplies and exhausts for assembling NC or NO valves.
If NC and NO valves are assembled on just one base, it is necessary to insert the inverter part A-350 for NO valves.

A - 326A - _ _ [(b)] G1/8 threaded connections (standard)
A - 326B - _ _ [(b)] M5 threaded connections (upon request)
A - 326C - _ _ [(b)] push-in connections tube 3 (upon request)

Sub-base for integrated electric connection

Sub-base with sub-D connector in extruded anodized aluminium up to max. 13 stations with connector 15 pin (upon request up to 23 with connector 25 pin) and G1/8 threaded standard connections, with conveyed supplies and exhausts for assembling NC or NO valves with integrated coil connection and optical indication of the valve activation.
If both, NO and NC valves, are assembled on just one sub-base, NC valves are always mounted on the connector side and afterwards the NO valves. The invert (part no. A-350) is inserted for NO valves.

Advantages
The original UNIVER "Speed" series was designed to solve some operational problems

- Possibility of defining the number of sub-bases at the moment of use
- Possibility of freely increasing or reducing the number of elements
- Quick assembly with special screw (built-in) standard supplied
- Reduction of stock holding
- Easy technical intervention

Air supply is rotated by 90° in comparison with side consumption
Standard (built-in) screw and O-Ring

When assembling the manifold, put the bases on a flat surface and tighten the screw until the manifold is perfecty aligned.

ISO 5599/1 Valves

- Compliance with ISO 5599/1 international standards
- Full range: 1 - 2 - 3 - 4 size
- Two different internal commutation system: mixed and spool, appreciated for decades thanks to their maximum reliability
- High capacity
- Short internal stroke
- No lubrication
- Electric connection M12 for 1 - 2 - 3 size
- Modular base
- Possibility of mounting different sizes on the same sub-base

TECHNICAL CHARACTERISTICS

Ambient temperature				-10 ÷ +50 °C
Fluid temperature				max +50 °C
Fluid				**mixed system:** not dehumidified filtered air 50 µm
				spool system: filtered air 50 µm, dehumidified or not
Commutation system				mixed system, spool system
Ways/Positions				**5/2, 5/3**
Pressure				10 bar max
Control				indirect electro - pneumatic, pneumatic
Return				**mixed system:** pneumomechanical spring
				spool system: mechanical spring
Connections				ISO 5599/1 interface
	size 1	**size 2**	**size 3**	**size 4**
Nominal Ø (mm)	8	10	15	19
Nominal flow rate (Nl/min)	1480	2300	4200	6600

CONSTRUCTIVE CHARACTERISTICS

Valve body	acetalic resin
Cover	zamak - aluminium
Seals	**mixed system:** nitrile rubber and polyurethane
	spool system: nitrile rubber
Sub-base	zamak - aluminium
Actuators	technopolymer
Spool	aluminium

ELECTRIC CHARACTERISTICS

Electropilot	AA CNOMO (U1) series
Coil	U3 DC series
Power consumption	2,5 W (DC) - 5 VA (AC)
Voltage	12 V DC - 24 V DC - 24 V AC - 110 V AC - 230 V AC
Connector	AM 5111
Manual override	with two position screw (standard)
	with button with tool (upon request)

ISO 5599/1 Standard

The ISO standard for pneumatic valves is accepted by industry and by the majority of major pneumatic valve manufactures throughout the world. The choice of valves according to ISO standard means to be at the technical forefront and to guarantee the user the interchangeability of both the valve body and the electromagnetic part

Electrovalves are supplied without coil, connector and locking ring

The use of pneumatic component in the automotive field, coupled with electric components, led to the development of a traditional ISO valve with electric connector M12 placed in central position, for both valves with single as well as double electric contol.

NAMUR valve

- Mixed commutation system (spool-poppet)
- High flow rate
- Quick response time
- High cycle rates
- Control: pneumatic, electric
- Suitable for rotating pneumatic actuators used in industrial plants for the distribution of fluids
- NAMUR VDI/VDE 3845 interface

TECHNICAL FEATURES

Ambient temperature	-10 ÷ 45 °C
Fluid temperature	-10 ÷ 50 °C
Fluid	filtered air 50 µm, lubricated or not
Commutation system	poppet mixed system
Ways/Positions	**5/2**
Pressure	10 bar max
Control	pneumatic, electric
Return	pneumomechanical spring, pneumatic, electric
Connections	**1-3-5:** G1/4 **2-4:** NAMUR interface
Nominal Ø	8 mm
Nominal flow rate	1200 Nl/min

TECHNICAL FEATURES

Valve body	zamak
Seals	polyurethane - nitrile rubber
Actuators	technopolymer
Spool	aluminium

ELECTRIC FEATURES

Electropilot	U1
Coil	DA
Power consumption	3,5 W (DC) - 5 VA (AC)
Connector	AM-5110

G6

20 mm - G 1/8 Valves and solenoid valves

- G1/8 threaded valve body with traditional Univer spool system
- Version with integrated electrical connection and esternal connection
- Compact design
- High flow rate
- Versions available: 5/2 - 5/3 - 3/2+3/2

TECHNICAL CHARACTERISTICS

Ambient temperature	-20 ÷ +50 °C
Fluid temperature	max +50 °C
Fluid	filtered air 50 µm not dehumidified, lubricated or not
Commutation system	spool
Ways/Positions	**5/2, 5/3, 3/2+3/2**
Pressure	1,5 ÷ 9 bar
Control	indirect electro-pneumatic, pneumatic
Return	mechanical spring, pneumomechanical spring
Connections	G1/8
Nominal Ø	5 mm
Nominal flow rate (Nl/min)	5/2 = **770** 5/3 = **700** 3/2+3/2 = **670**

CONSTRUCTIVE CHARACTERISTICS

Valve body	zamak
Seals	nitrile rubber
Subbase and actuators	self-extinguishing technopolymes
Spool	aluminum

ELECTRIC CHARACTERISTICS

Electropilot/coil	A/U05 series
Voltage	24 V DC standard, upon request 12 V DC
	24 V AC - 110 V AC - 230 V AC
	(only for version with integrated electrical connection)
Power consumption	for direct current 2 W (2,3 VA)
Protection degree	IP65
Manual override	with button with tool 1 position

G7

26 mm G1/8 valves and solenoid valves

- G1/8 threaded valve body with traditional Univer spool system
- Versions available 5/2-5/3
- Aluminium multiple sub-base

TECHNICAL CHARACTERISTICS

Ambient temperature	-10 ÷ +45 °C
Fluid temperature	max +50 °C
Fluid	50 µm filtered and not dehumidified air, lubricated or not
Commutation system	spool
Ways/Positions	**5/2, 5/3**
Pressure	10 bar max
Control	indirect electro - pneumatic, pneumatic
Return	mechanical spring, pneumomechanical spring
Connections	G1/8
Nominal Ø	6 mm
Nominal flow rate	860 Nl/min

CONSTRUCTIVE CHARACTERISTICS

Valve body	zamak
Seals	nitrile rubber
Actuators	technopolymer
Spool	aluminium

ELECTRIC CHARACTERISTICS

Electropilot	U1
Coil	DA series
Power consumption	3,5 W (DC) - 5 VA (AC)
Connector	AM-5110
Voltage	12 V DC - 24 V DC - 24 V AC - 110 V AC - 230 V AC
Manual override	with 2 position screw

COMBOBOX valves

- Valves with compact design: valve body with integrated sub-base
- High flexibility:
  > possibility of choosing fitting dimension (4-6-8) according to users' needs
  > manifolds from 2 up to 20 valve positions
  > electric and pneumatic control - versions 3/2+3/2 - 5/2 - 5/3
  > different pressures (vacuum included)
- Electrical connection: external - multipolar - serial connections

* = For intermediate plate with closed pilot supply ports add suffix 1 to part number.
The intermediate plate occupies one valve place, please keep this in mind for a correct order of the modular tie-rods.

Air supply of the electropilots by means of the end plates for both internal and external air supply. In case there are two different working pressures at the end plates, it is possible to supply all pilots with one of the two pressures (in general with the higher one) or to supply the pilots of each valve group with the working pressure of the same.
This can be realized by choosing the correct separation plate.
The same is valid if the pressures are more than two: in this case it is necessary to use intermediate supply plates suitably coupled with the separation plates.

Poppet valves for vacuum G1/8 ÷ G1 1/2

- A complete range: G1/8 - G1/4 - G3/8 - G1/2 - G3/4 - G1 - G1 1/2
- Original Univer poppet system appreciated for decades
- Servoassisted version
- A complete range of solenoid valves and pneumatic valves for vacuum with connection from G1/8 ÷ G1 1/2 to satisfy all requirements
- The internal system ensures high reliability and long life

TECHNICAL CHARACTERISTICS

Ambient temperature	+50 °C						
Fluid temperature	-5 ÷ +60 °C

weight: 0,020 Kg

Part numbers include M3x12 fixing screws (4 pcs) and M5x5 dowel pins to close the unused ways.
The M5x5 dowel pins must be mounted with loctite (243 type). Be sure that loctite does not obstruct the ports or sinks inside the valve.
The dowel pins must be screwed till reaching the base surface. Avoid screwing them completely.

Pneumatic and electric foot valves

- Double poppet system appreciated for its reliability and high flow rate
- Aluminium valve body and pedal lever to the max strenght
- Available with and without protection (in the latter case the protection is to be realized by the machine builder according to the current rules)
- Available with safety devices to prevent unintentional operations
- Available with pneumatic servo-assitance in case of minimum stress
- Electric foot valves with single or double microswitch complete the foot valve range

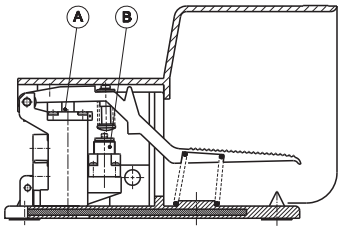
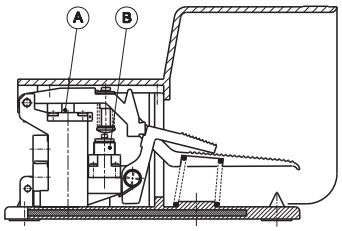
Functioning

Pedal with spring return



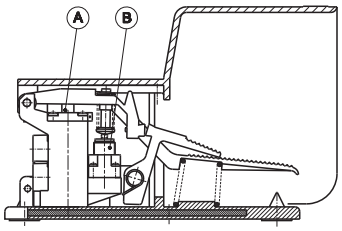
Direct operation **A** or pneumatic servo-assistance **B.**

Pedal with two positions (bistable)



The pedal must be deeply pressed. The unlocking pedal brings the pedal back to the starting position.

Pedal with safety device



Operation in possible only by pushing both pedals at the same time. Pedals return to the starting position by releasing them. In this case unintentional operation is avoided.

COMPACT VALVES

5 COMPACT valves

P10

10mm COMPACT valves - threaded body and for sub-base mounting

- Low standard power consumption (0,32W): low power consumption electropilot B10 (standard version with LED)
- Quick response times
- High flow rate: the development of the traditional UNIVER spool technology permits high flow rate values
- Compact design: the valve body (10mm) allows reduced overall dimensions
- Complete solution
- Threaded body (P10F) and body for sub-base (P10B) in the following versions: 5/2 - 5/3 - 3/2+3/2
- External and multipolar electrical connections
- TC serial transmission system
- Maximum application flexibility
- Modular sub-base (single and double) for a high versatility in the composition of the valve manifolds
- Simplified installation
- Easy installation of tubes and fittings thanks to connections being all on the same side

P15

15 mm COMPACT valves - threaded and for sub-base body

- Low standard power cosumption (0,32W): low power consuption electropilot B10 (standard version with LED)
- Quick response times
- High flow rate: the development of the traditional UNIVER spool technology permits high flow rate values
- Compact design: the valve body (15 mm) allows reduced overall dimensions
- Complete solution
- Threaded body (P15F) and body for sub-base (P15B) in the following versions: 5/2 - 5/3 - 3/2+3/2
- External and multipolar electrical connections
- TC serial transmission system
- Maximum application flexibility
- Modular sub-base (singles and doubles) for a high versatility in the composition of valve manifolds
- Simplified installation
- Easy installation of tubes and fittings thanks to connections being all on the same side

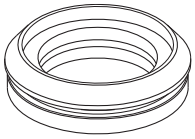
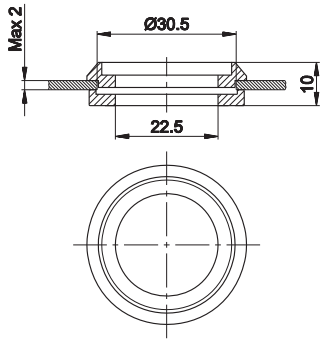
AI-3529





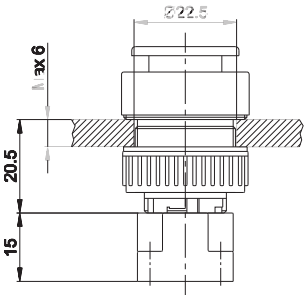
reducer for Ø 30,5 to Ø 22,5, to be used with AI-35..Q limit switches
(for details refer to next page)

(a) = force at 6 bar with actuators assembled on AI-35..
(b) = to be used with valves preset with flange for panel mounting

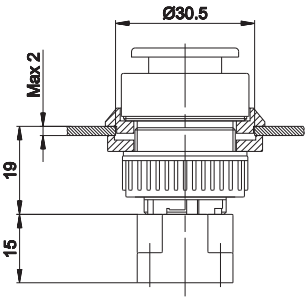
Reducer

Manual actuators for screw mounting (ring nut)

Panel mounting for Ø 22,5 bore sizes

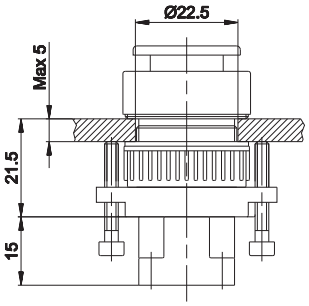


Panel mounting for Ø 30,5 bore sizes



Manual actuators for panel mounting (ring nut+screws)

Panel mounting for Ø 22,5 bore sizes



Panel mounting for Ø 30,5 bore sizes, just for manual actuators with screw
